

Center for Advanced Studies in Engineering (CASE) represents Pakistan

Team Members: Mansoor Shaukat, Raheel Bhutta, Ali Syed, Wajid Ehsan (Team Leader), Saqib Khalid, Umair Rasheed, Saad Ahmed, Muadh Jamal Solaija, Zohaib Hasan, Rizwan Ahmed, Emad Majeed, Awais Butt, Umar Farooq, Nauman Abdullah and Raja Jawad.

It is the first time CASE is participating in the ABU ROBOCON. The robotics group at CASE known as CRG has been functional for only two years now. CASE has since been a regular participant of the largest national competition of robotics known as National Engineering Robotics Competition (NERC) and holds the championship title for two consecutive years.

Team is named 'Persistent Persuader' for its perpetual motivation to improve upon designs and will to do better. The team will be bringing in its 1 manual and 3 automatic machines and hopes to deliver a better performance than earlier Pakistani teams.

Report by Mr Mansoor Shaukat, Team Supervisor, CASE.

First Victory for University of Electronic Science and Technology of China (UESTC)

On 4 July, 41 teams met in Beijing for The ABU Robot Contest China 2010. We won the champion title, for the first time in UESTC history.

Our team consists of 31 students, who are all juniors from different schools in UESTC, and 2 instructors.

We have taken part in every domestic contest since its first holding in 2002. In 2008 and 2009, we won the 3rd place. Finally this year, after 8 years of continuous effort, we won the champion title.

We really cherish the chance to meet and learn from other teams.

Report by Mr Li Dongqing, University of Electronic Science and Technology of China
